

Training in New Haven, Connecticut!

Digital Photography for Traffic Crash Investigators (40 Hours)

Clear, identifiable photographs are essential for both the subsequent investigation as well as the courtroom presentation. This comprehensive “hands-on” course addresses the unique characteristics of crash scene photography and will teach you how to properly photograph a crash scene, no matter what the size or environmental conditions.

Since time is of the essence in opening the roadway and resuming normal traffic flow, we will show you valuable and timesaving techniques for quickly and accurately photographing the scene. And because much can be lost when the scene is cleared, you will learn the methods and settings to achieve the best results the first time.

“Hands-on” exercises photographing crash scenes and wrecked vehicles will accompany class lectures to give you a thorough working knowledge of your camera’s component parts and accessories. We will also explain the legal guidelines for archiving photographs and presenting photographic evidence in court.

In addition, we will present you with an overview of videotaping as it relates to the crash scene. You will

have the opportunity to see new equipment and hear about future technical advances in this field.

Topics include:

- Use of digital cameras
- Analyzing the crash scene
- Close up documentation
- Lighting conditions
- Night, inclement weather and flash photography
- Photographing vehicle damage
- Photographing human body injury

Note: Please bring your agency’s digital camera as well as an external flash unit, sync cord for flash to camera connection, a card reader and a tripod with you. A circular polarizing filter is strongly recommended.

Audience: Law enforcement and private traffic crash investigators, claims adjusters, engineers, attorneys, safety officers, military investigative personnel, animators and graphic designers
